## Specialty Medications

Specialty pharmaceuticals are typically produced through biotechnology, administered by injection, and/or require special handling and patient monitoring. If your doctor has prescribed a specialty medication, we recommend that specialty pharmaceutical medications be submitted to Benecard Central Fill Specialty. This can be done in the same manner as you submit mail order prescriptions through Benecard Central Fill. Specialty medications are subject to your program's retail co-payment and at a limited day supply. Initial fills of a

specialty medication MAY be limited to a maximum two weeks supply in order to determine how the patient's mental and physical health will react to a particular medication.

## Copay Assistance Program

Certain specialty medications are eligible for copay assistance, providing members with a \$0 copay when submitted through our mail order pharmacy, Benecard Central Fill, or through a Benecard limited distribution pharmacy. Eligible members will be contacted by a Benecard representative who will help assist them in the enrollment process when applicable and prior to filling their specialty medication. The program works by modifying the member's required payments, but then applying third party assistance to ensure no increase in cost to the member.

## Primary Preferred Medication Program

The Primary Preferred Medication List is a voluntary guide for selecting clinically and therapeutically appropriate medications. It should not take the place of a physician's or pharmacist's judgment with regard to a patient's pharmaceutical care. The Primary Preferred Medication List is available online at [www.benecardpbf.com](http://www.benecardpbf.com) and is updated monthly. We suggest you share the Primary Preferred Medication List with your healthcare provider to facilitate prescribing from this list whenever appropriate to allow you to take advantage of cost savings that may be available. You may also consult with your pharmacist regarding generic medication options for your current brand medications.

## Save With Generics

Generic equivalent medications must meet the same Food and Drug Administration (FDA) standards for purity, strength and safety as brand name medications. They also must have the same active ingredients and identical absorption rate within the body as the brand name version. If you wish to take advantage of this savings opportunity, you should ask your physician to prescribe your medication either generically or as a brand with substitutions permissible. You may also consult with your pharmacist regarding generic medication options that may be available to you.
