Health Insurance Terms Refresher

We wrap up this series with a final assortment of helpful health care terms:

Dependent Status Change: If your dependent loses or gains eligibility for group coverage, it is your responsibility to adjust your health plan status accordingly. This includes, for example, disenrolling a spouse from whom you are now divorced or enrolling a newborn or new spouse for coverage. It is important to register a status change without delay to avoid loss of coverage or unexpected costs.

Eligible Dependent: An individual, adult or minor, who qualifies for group coverage under your plan based on certain guidelines.

Drug Formulary: A list of generic and brand-name prescription drugs that are chosen by your pharmacy plan to treat certain health conditions. These drugs have been evaluated and researched for safety and effectiveness, and are often the most cost-effective versions of commonly prescribed medications.
