Live Well, Work Well

Summer Food Safety Tips

You'll likely spend time outside with family and friends this summer at a picnic or backyard barbecue. However, if you aren't careful about handling foods and beverages during these cookouts, you're putting yourself and others at risk for potential food-related illnesses.

The U.S. Centers for Disease Control and Prevention (CDC) estimates that 1 in 6 people get sick from a foodborne illness each year.

Bacteria multiply especially fast in the summer heat, making outdoor cookouts prime breeding grounds for E. coli and salmonella. Symptoms of foodborne illnesses may include nausea, vomiting, diarrhea, and abdominal cramping. Prevent food poisoning at picnics and barbecues with these four simple steps from the CDC:

1. **Clean.** Wash cookware, dishes, and utensils between uses. Clean the grill surface after each use and wash cutting boards after preparing raw meat. Germs can survive in many places, so clean hands and surfaces is critical.

2. **Separate.** Use one cooler for drinks and one for food. It's also important to separate raw foods (e.g., poultry, seafood, and eggs) from those ready to eat. Lastly, never eat anything left out of a refrigerator or cooler for more than two hours or one hour if the temperature is above 90 degrees Fahrenheit.
3. **Cook.** Food is safely cooked when the internal temperature is high enough to kill germs that can make you sick. The best way to know if food is cooked properly is by using a meat thermometer. For example, burgers and hot dogs should be cooked to 160 degrees Fahrenheit and chicken to 165.
4. **Chill.** Refrigerate food promptly since bacteria can rapidly multiply if left at room temperature. The "danger zone" for bacterial growth is 40-140 degrees Fahrenheit.

If you have mild food poisoning, it's important to stay hydrated. Keep in mind that more serious cases, which often include a fever and dehydration symptoms, require medical attention.

Reaping the Health Benefits of Gardening

Interest in home gardening continues to rise amid economic concerns. Although the annual Axiom Gardening Outlook Study found overall decreases in time spent gardening or expanding gardens, younger generations have been picking up gardening tools in recent years and plan to continue.

There's no denying that gardening has numerous benefits. It's a good way for households to get healthier and cheaper food, but it also helps people reach their movement goals. The CDC counts weeding, mulching, and mowing as moderate exercises, while raking and digging are vigorous.

In addition to physical activity and [healthier eating habits](#), consider these health benefits of gardening:

- Increased vitamin D levels that are essential for body functions
- Reduced cortisol levels that trigger stress
- [Improved mood](#)
- Relaxation and reduced anxiety
- Boosted self-esteem

If you haven't tried gardening, it's not too late to reap the benefits. Talk to your doctor about ways to manage your well-being and log into your [Aetna](#) / [AHA](#) online account for more wellness info.

Important Notices:

CHIP Notice: if you live in New Jersey, you/your dependents may be eligible for health coverage assistance from Medicaid or CHIP. See the attached notice or visit dol.gov for details.

Summertime Life Events Reminder: while generally able to change benefit elections only during Open Enrollment, certain life events qualify as an exception. If you experience, for instance, a spouse's loss of coverage, marriage, or birth over the summer, notify the District benefits contact *immediately* to learn your options. Find more eligibility info at Staff Portal / *Benefits Online*.

Sleep Tips for the Long Summer Days

As the days grow longer and temperatures rise, many people find falling and staying asleep increasingly difficult. In addition, people may have busy social schedules for the summer. Summer sleep disturbances can be frustrating, but with a few practical tips, you can improve your [sleep quality](#) despite the seasonal changes. Try these tips:

- **Keep a consistent schedule.** Late nights can happen in the summer, and that's OK. Overall, try to stick to a regular and consistent sleep schedule to regulate your circadian rhythm.
- **Create a cool sleep environment.** Keep your bedroom cool with fans and air conditioning, or prop open doors and windows.

- **Use lightweight fabrics.** Opt for lightweight and moisture-wicking pajamas and bedding. Materials like cotton, linen, bamboo, and silk are cooling.
- **Try a sleep mask.** Longer daylight hours can disrupt sleep cycles; wear a sleep mask to create a dark environment. Avoid blackout curtains as some light alerts your body that the day is coming.
- **Stay hydrated.** Drink plenty of water throughout the day to stay hydrated in the heat, but avoid large amounts right before bed to prevent waking up for bathroom trips.

Small changes can improve your summer slumber, but talk to your doctor (aetna.com / ahatpa.com) for sleep guidance.

Premium Assistance Under Medicaid and the Children's Health Insurance Program (CHIP)

If you or your children are eligible for Medicaid or CHIP and you're eligible for health coverage from your employer, your state may have a premium assistance program that can help pay for coverage, using funds from their Medicaid or CHIP programs. If you or your children aren't eligible for Medicaid or CHIP, you won't be eligible for these premium assistance programs but you may be able to buy individual insurance coverage through the Health Insurance Marketplace. For more information, visit www.healthcare.gov.

If you or your dependents are already enrolled in Medicaid or CHIP and you live in a State listed below, contact your State Medicaid or CHIP office to find out if premium assistance is available.

If you or your dependents are NOT currently enrolled in Medicaid or CHIP, and you think you or any of your dependents might be eligible for either of these programs, contact your State Medicaid or CHIP office or dial **1-877-KIDS NOW** or www.insurekidsnow.gov to find out how to apply. If you qualify, ask your state if it has a program that might help you pay the premiums for an employer-sponsored plan.

If you or your dependents are eligible for premium assistance under Medicaid or CHIP, as well as eligible under your employer plan, your employer must allow you to enroll in your employer plan if you aren't already enrolled. This is called a "special enrollment" opportunity, and **you must request coverage within 60 days of being determined eligible for premium assistance**. If you have questions about enrolling in your employer plan, contact the Department of Labor at www.askebsa.dol.gov or call **1-866-444-EBSA (3272)**.

If you live in one of the following states, you may be eligible for assistance paying your employer health plan premiums. The following list of states is current as of March 17, 2025. Contact your State for more information on eligibility –
